Q-Plan/W4RES

#REenergisingEurope

These projects have received funding from the European Union's Horizon 2020 research programme. The sole responsibility for the content of this event lies with the BECoop, MICAT, newTRENDS, NRG2peers, NUDGE, UP-STAIRS and W4RES projects and does not necessarily reflect the opinion of the European Union.

# RE-ENERGISING EUROPE

October 25

## Energy communities and renewable energy, accelerating Europe's transition towards a climate neutral, inclusive future

Organised by BECoop, NRG2PEERS, UP-STAIRS and W4RES

Master of ceremony: Ioannis Konstas, Q-PLAN

8.45 - 9.00 - **Registration & welcome coffee**

9.00 - 9.15 - **Keynote** - Tadhg O'Briain, European Commission, DG Energy, Deputy Head of Unit for Consumers, Local Initiatives and Just Transition (tbc)

9.15 - 9.40 - **Skill up! RECs, RES, inclusivity: What are we talking about? Fire pitching of the 4 projects**

- Dimitrios Chapizanis, White Research (representing BECoop)
- Simona D'Oca, Huygen Engineers and Consultants (representing NRG2peers)
- Lorena Sánchez Relaño, IERC (representing UP-STAIRS)
- Giulia Zendron, White Research (representing W4RES)

9.40 - 11.00 - **Policy panel: Driving a clean energy transition through tapping the biomass potential, boosting rescoops and empowering women as agents of change: discussing the projects' recommendations**

Moderation: Pádraig Lyons, IERC

Fire pitch by project representatives:

- Diana Süsler, IEECP (for BECoop)
- Anna Klöpper, UIPI (for NRG2Peers)
- Paweł Gilewski, Polish National Energy Conservation Agency (KAPE) (for UP-STAIRS)
- Elsebeth Terkelsen, European Green Cities (for W4RES)

Then joined in a panel by:

- Stavroula Pappa, REScoop.eu
- Tadhg O'Briain, European Commission, DG Energy

11.00 - 11.15 - **Coffee break**

11.15 - 12.15 - **Get inspired - Innovative Approaches, Success stories from the RES and RHC ecosystems**

Moderation: Dara Tumbull, Housing Europe

- BECoop - From your morning coffee to heat: Vasilis Filippou (ESEK)
- NRG2peers - Lessons learnt from the pilot sites: Eelke Kingma (Schoonschip)
- UP-STAIRS - One-Stop-Shops to empower community energy: Ivanka Pandelieva-Dimova (Sofia Energy Centre)
- W4RES - Charlotte Schlicke (Steinbeis Europa Zentrum) and Carina Holzapfel (H2MC)

12.15 - 13.30 - **Lunch + poster session**

13.30 - 14.30 - **The legacy of our projects / Looking forward - Once our projects end: what comes next? How can we replicate our projects' findings/work?**

Moderation: Dimitrios Chapizanis, White Research

- W4RES: Ioannis Konstas, Q-PLAN - The next steps for W4RES in terms of gender awareness in RES - The way to an inclusive energy transition
- UP-STAIRS: Paco Jofra, Ecoserveis Association
- NRG2peers: Stefan Kop, Spectral & Sylvia Breukers, Dune Works - Tool and follow-up projects.
- BECoop: Kostas Dasopoulos, Q-PLAN - Adjusted Business Model Canva for RESCoops

14.30 - 15.30 - **Networking session**

- W4RES co-creation workshop "DIY Gender Equal RES sector: Dive into practice with W4RES towards a gender equal RHC and RES sector". Register [here](#) (the number of seats is limited).
- Poster presentations, world café discussions, access to computers to play with our tools, etc.

15.30 - 18.00 - **Visit to an energy community**

# RE-ENERGISING EUROPE

Keynote

October 25, 2023 - From 9.00 to 9.15

**Tadhg O'Briain**

European Commission, DG Energy,  
Head of Unit for Consumers, Local  
Initiatives and Just Transition

#REenergisingEurope

UNLOCKING THE COMMUNITY BIOENERGY  
POTENTIAL

## BECoop Project Overview

Dimitris Chapizanis, Project Coordinator | White Research

This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement no. 952930.

# BECoop: Why BECoop?

LC-SC3-RES-28-2018-2019-2020 - Market Uptake support

Slow RES penetration in the EU heating and cooling sector that accounts for 51% of EU's total energy consumption

- **Bioenergy** holds the highest potential for replacing fossil-fuelled heat

Dire need for increasing bioenergy towards decarbonising the EU energy system

- **Community energy, RESCoops: key factor for future RE market uptake**
- **Dispersion and range of RESCoops** across Europe is still **limited**
  - still relatively undeveloped in southern, central and eastern Europe
- Only a **small share** of RESCoops use **biomass**

- VS -

The bioenergy industry is missing out on important market opportunities

# BECoop: Project in a nutshell

LC-SC3-RES-28-2018-2019-2020 - Market Uptake support

- BECoop **mobilises people around community bioenergy** and creates a better image for such initiatives  
**reduces the development efforts** of community bioenergy heating projects

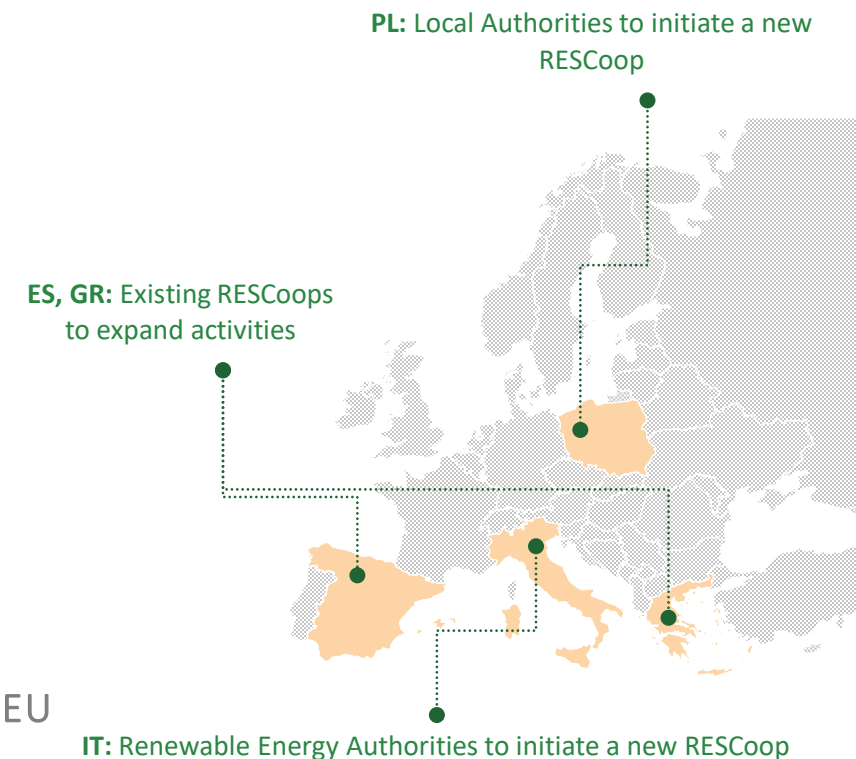

- market research, social, technical, business, knowledge transfer and **policy components**

- A suite of **supporting resources and tools** for community bioenergy project development

- exploration and support of **4 new bioenergy heating communities (BECoop RESCoops)**

We test the implementation of community bioenergy heating support scheme in diverse, complementary pilot cases in regions with high replication potential across EU

# BECoop: Project numbers

We mobilise people around community bioenergy

- We validate our results and **open the policy debate** on *how* community bioenergy at local, national and EU level can be fostered.

**1** EU level and **4** national level and policy roadmaps

**50+** events (co-creation workshops, consultations, webinars, info days, etc.)

**30+** community bioenergy cases analysed

**10+ (25)** sister projects synergies

**4** BECoop pilot cases and **8** additional replication cases of our concept

**1** Replication Handbook

# BECoop: Project's legacy

We make bioenergy community heating more appealing

## The BECoop Replication handbook

- Builds upon the **entire project experience and pilot implementation results**
- Provides a **step wise approach** for the development or expansion of community bioenergy heating initiatives

## The BECoop tools

WOMEN FOR MARKET UPTAKE OF RENEWABLE HEATING AND COOLING

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 952874

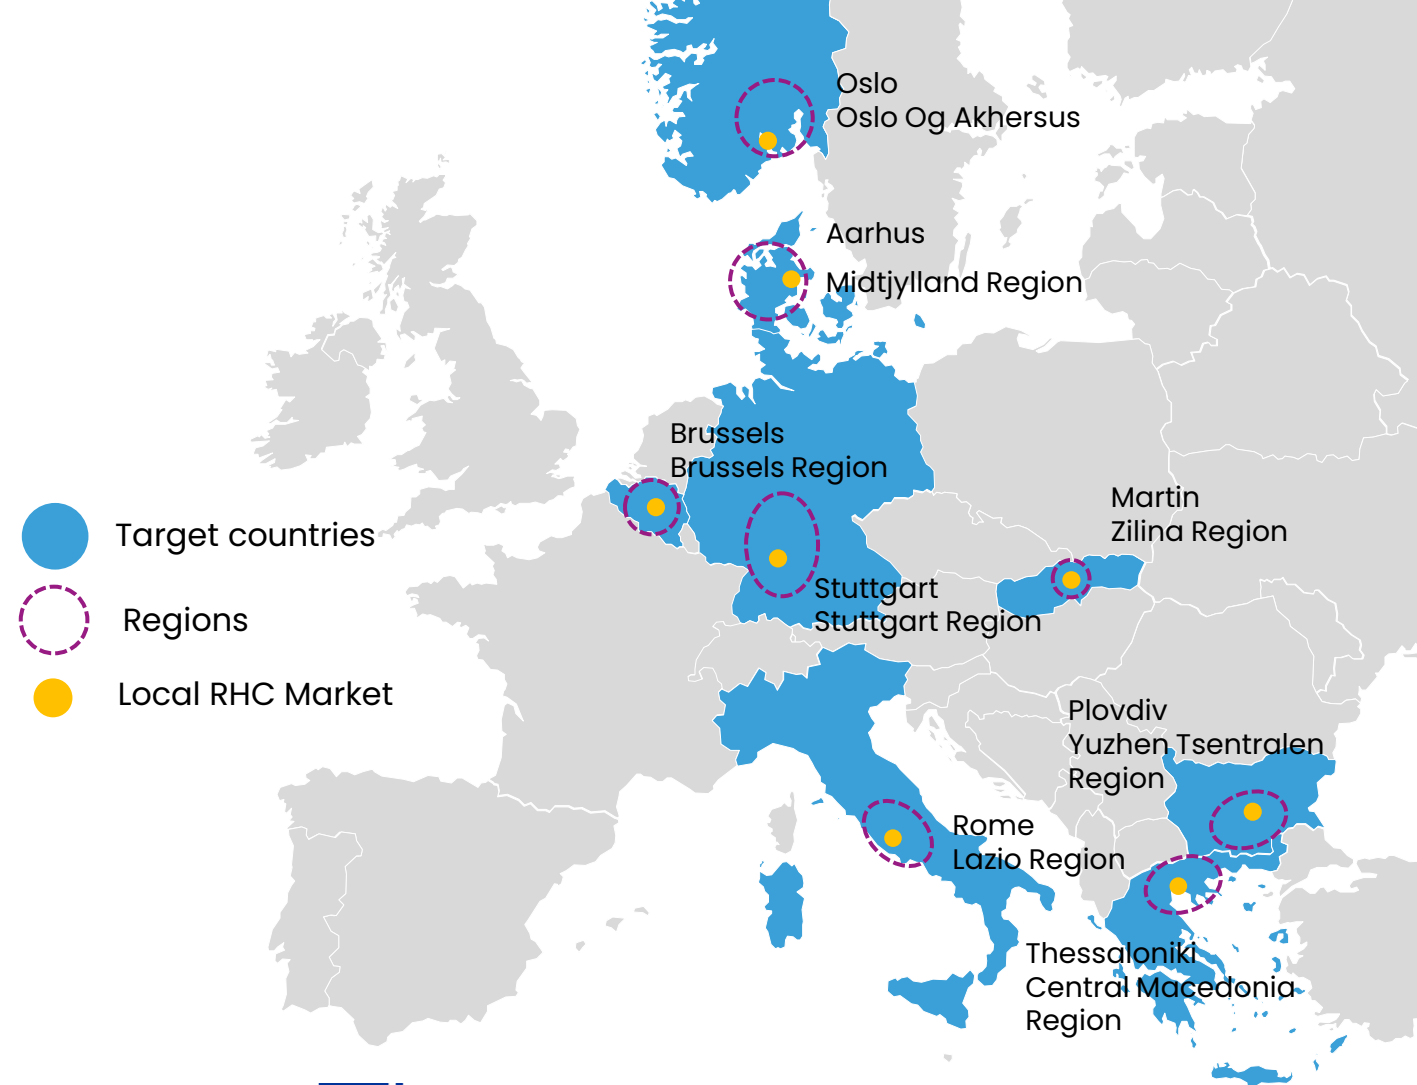

Giulia Zendron  
White Research

# w4RES

Tapping into the potential of women for supporting renewable energy in the heating and cooling market

- **EU funded**
- **12** partners
- **8** European countries
- **Timeframe:** 2020 – 2023

# Heating and Cooling and the transition to a greener industry

**50%** of Europe's final energy demand

**23%** renewable energy in heating/cooling in 2018

**80%** of EU's demand from natural gas (=90% of EU gas imports)

**38%** of EU emissions from heating

### Share of energy from renewable sources for heating and cooling, 2021

# Women representation in the sector

Proportion of women scientists and engineers in the EU (2018)

ec.europa.eu/eurostat

2019

Share of women in the renewable energy workforce

Share of women in the oil and gas industry

STEM jobs

Non-STEM Technical Jobs

Administrative jobs

Shares of women in STEM, non-STEM and administrative jobs in renewable energy

# W4RES main scope

EU  
renewable  
energy  
targets for  
2030

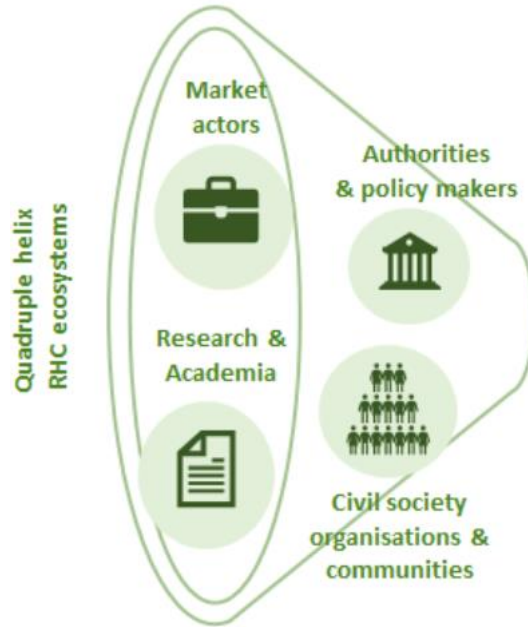

Addressing the **Transition**  
from Fossil Fuels to  
**Renewable Energy**

Scaling up the **involvement**  
of women in the market  
deployment and uptake of  
**RHC solutions**

# W4RES in a nutshell

Insights

# Challenges and opportunities for collective and cooperative actions

**Paweł Gilewski, PhD**

The Polish National Energy Conservation Agency  
Warsaw University of Technology, Poland

**UP-STAIRS** Uplifting  
Energy Communities.

# Challenges

- The participation of residents in energy communities depends to a large extent on the availability of programs co-financing individual activities.
- The existence of a thorough legislative framework for energy communities.
- The need to inform citizens about energy community activities and energy efficiency and renewable energy measures.

# Opportunities

- Close cooperation between representatives of local authorities and representatives of One Stop Shops can have a positive impact on the operation of energy communities.
- It is very important to have a specific legislative and regulatory framework for energy communities at national/regional level, as this increases the willingness of residents to participate in collective actions and the creation of energy communities.

# Recommendations

- Reducing excessively high pre-requirements that can discourage residents.
- The initiative of the energy community should be promoted and facilitated through an appropriate legislative framework.
- Promotion of the concept of energy communities by national authorities, which can increase trust in the concept.

[www.w4res.eu](http://www.w4res.eu)

[welcome@w4res.eu](mailto:welcome@w4res.eu)

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 952874

# EUROPEAN GREEN CITIES

- Aarhus and Copenhagen, Denmark
- Network, non-profit – supporting the development of green cities (sustainable energy supply, energy efficiency, mobility and biodiversity) – by promoting and participating in innovation projects
- 57 cities in 19 countries

# Policy Recommendations

Support **women** in driving market **uptake** of renewable heating and cooling (RHC)

## Policy Recommendations

1. Support a Gender Balanced RHC Sector for Future Generations
2. Promoting an Inclusive Workplace in the RHC Sector
3. Advancing Gender Equity in the RHC Sector
4. Institutionalize Awareness on Gender Mainstreaming
5. Raise and Provide Funds for Women-Led Projects in the RHC Sector

## 1. Support for a gender balanced RHC sector in future generation

- Awareness Campaigns in Schools
- Connect Climate Protection and STEM
- Facilitate School-Company Cooperation
- Emphasize Intercultural and Social Skills
- Skills Training and Technical Support

## 2. Promoting an Inclusive Workplace in the RHC Sector

- Gender Quotas
- Networking Opportunities
- Mentoring Programs
- Gender and Family-Friendly Policies
- Gender-Responsive Budgeting
- Safe Reporting Procedures

# European Green Cities as Work Place

- Gender Policy for Employing

# The Regional Unit of Karditsa

**Agrafa Mountains**

**Plastira Lake**

## The Karditsa plain

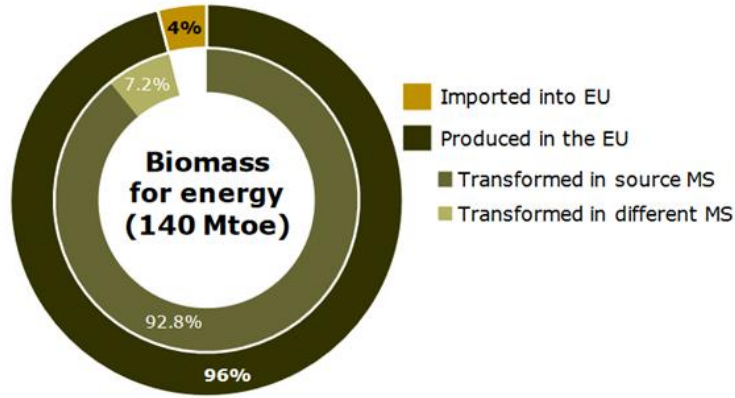

- **Population: 113,544 inh. (2011 census)**
  - 1 % of the Greek population
  - 34 % of the local population lives in the city of Karditsa
- **Area: 2.636 Km<sup>2</sup>**
  - Flat land: 47.7 %
  - Mountainous areas: 44 %
  - Semi-mountainous areas: 8.3 %
- **Eastern part: part of the Thessaly plain**
- **Western part: Agrafa mountains**

# The Energy Community of Karditsa – a short history

- It is based in the participation of citizens and SMEs of Karditsa's prefecture (or originating from it) who are sharing a common vision of an energy independent prefecture. 400 members.
- It is supported by local authorities:
  - Chamber of Commerce,
  - Regional Authority,
  - Municipalities,
  - Cooperative bank
- It was hosted in the "incubator" of the Development Agency.

# Why Biomass?

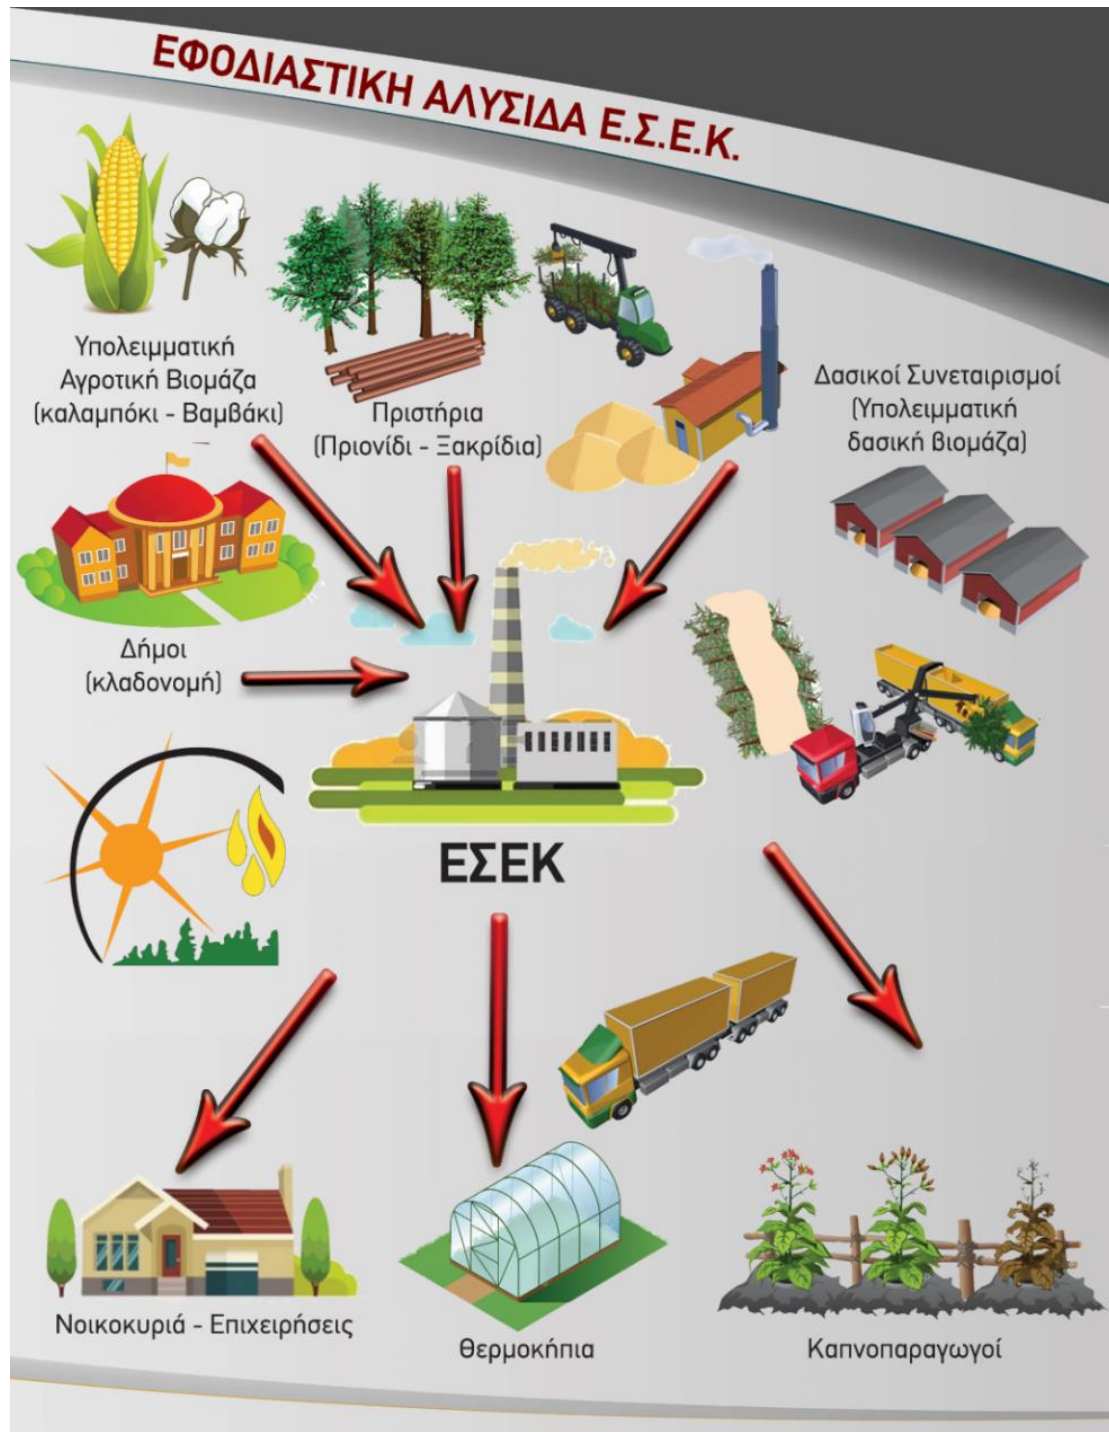

Origin of biomass supplied for energy in 2016 in the EU-28. Source: [NREAP Progress Reports](#).

# UP-STAIRS One-Stop-Shops to Empower Community Energy

Ivanka Pandelieva-Dimova

SEC

[ivankap@sec.bg](mailto:ivankap@sec.bg)

# UP-STAIRS Uplifting Energy Communities.

RE-energising Europe –  
Sharing ideas and knowledge

24-25 October 2023  
Brussels, Belgium

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 892037

# Concept

- Creation of OSSs in five pilot regions: Asenovgrad Municipality (Bulgaria), Barcelona Metropolitan Area (Catalonia, Spain), Cork City (Ireland), Upper Austria Region (Austria), Rhodoshop (Rhodope Region, Bulgaria) ;
- OSSs help the creation of energy communities and assist citizens in the energy transition through provision of holistic advice according to the local or regional needs;
- OSSs establishment and operation is based on Business Model Framework (BMF) developed within the project and adapted to each pilot context.

# Focus of OSSs services

- ❖ OSS Barcelona и OSS Upper Austria focus mainly but not exclusively on support for **creation of Renewable Energy Communities and implementation of RES (PV) in buildings;**
- ❖ OSS Asenovgrad, OSS Cork и OSS Rhodoshop focus mainly but not exclusively on support for **creation of Citizen Energy Communities for energy refurbishment of residential buildings.**

# Key successes in figures

- **People outreached: 62 511**
- **People involved/engaged: 11 857**
- **Energy savings (expected): 17.2 GWh/y**
- **PV energy (to be) produced: 58.1 GWh/y**
- **Building area (to be) refurbished: 316 751 sq.m.**
- **PV energy (to be) installed: 40 MW**
- **Associated expected investment: 71.7 MEuro**
- **Energy communities supported: 340**

# Key findings from OSS operation

## Background

Lack of key information for homeowners:

- ✓ where to start on establishing an energy community in their area.
- ✓ the route to getting financial help;
- ✓ policy framework and where to find it;
- ✓ the increased community benefits.

## Challenges and Lessons

- ✓ Numerous regulatory barriers to establishing a renewable energy community (Ireland and Bulgaria);
- ✓ Capacity in the construction area not sufficient in a reasonable timeframe across all grant routes (Ireland).
- ✓ Service should be free for citizens, especially those at risk of energy poverty;
- ✓ Technical and legal background of ICs important;
- ✓ Proactive behaviour of ICs needed;
- ✓ Coordination between many home owners in one building a challenge (Bulgaria);
- ✓ Low awareness and lack of interest towards ESCO contracts as funding option (Bulgaria).

# OSS Cork Home Energy UpGrade Office

6500 citizens informed about benefits of Energy Community formation in Ireland

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 892037

**RE-energising Europe – Sharing ideas and knowledge**

24-25 October 2023, Brussels, Belgium

# OSS Asenovgrad buildings

Before

After

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 892037

**RE-energising Europe – Sharing ideas and knowledge**

24-25 October 2023, Brussels, Belgium

# OSS Barcelona Metropolitan Area

**Engaging activities** to promote self consumption and energy communities

- Citizens assistance: 1770 citizens
  - 1 special session (shared self consumption in a multi-family building)
- SME's assistance: 590 SME's

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 892037

**RE-energising Europe – Sharing ideas and knowledge**

24-25 October 2023, Brussels, Belgium

# OSS Upper Austria

- 1000+ individual advice sessions
- 50+ events with 2500+ participants
- **100+ Energy Communities in operation in Upper Austria**

WOMEN FOR MARKET UPTAKE OF RENEWABLE HEATING AND COOLING

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 952874

Q-PLAN INTERNATIONAL

Yiannis Konstas

*Tapping into the potential of women for supporting renewable energy in the heating and cooling market*

- ❑ Support for young women willing to pursue a STEM related education
- ❑ Support for women/mothers to not penalize their (early) career development
- ❑ Visibility for successful women in RHC
- ❑ Support for participation in networking events

- ❑ Coaching and mentoring programs for female entrepreneurs
- ❑ Business support, skills training, and technical support
- ❑ Communications campaigns targeted to female users
- ❑ Collection and assessment of gender disaggregated data

# The W4RES Approach

# Energy Transition

*“..To be truly transformative, energy access and the energy sector must be linked with an agenda that challenges the stereotypes of women and that also advances their rights, dignity and visibility in their various roles as consumers, producers, investors, experts, and agents of change..”*

Thank you!

**UP-STAIRS** Uplifting  
Energy Communities.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 892037

# Project Description – in a nutshell

## Objectives

- Accelerating the creation of new energy communities in 5 pilot regions
- Supporting citizens and municipalities in becoming prosumers
- **Testing new Energy Service model frameworks of One-Stop-Shops for local collective actions which support local stakeholders in working together**
- Stimulating replication in other regions throughout the EU.

## Impacts

- Setting-up and testing 5 One-Stop-Shops for energy communities and collective local action
- Triggering 66 million Euro in sustainable energy investments / energy-related investments
- Engaging 10,000 consumers in sustainable energy activities

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 892037

# One Stop Shops deployment

## PHASES

# NRG2 PEERS

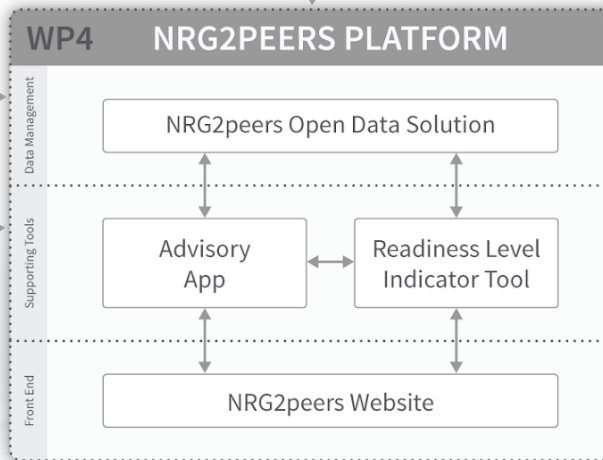

**Development of Digital Tools to enable the uptake  
of Energy Communities**

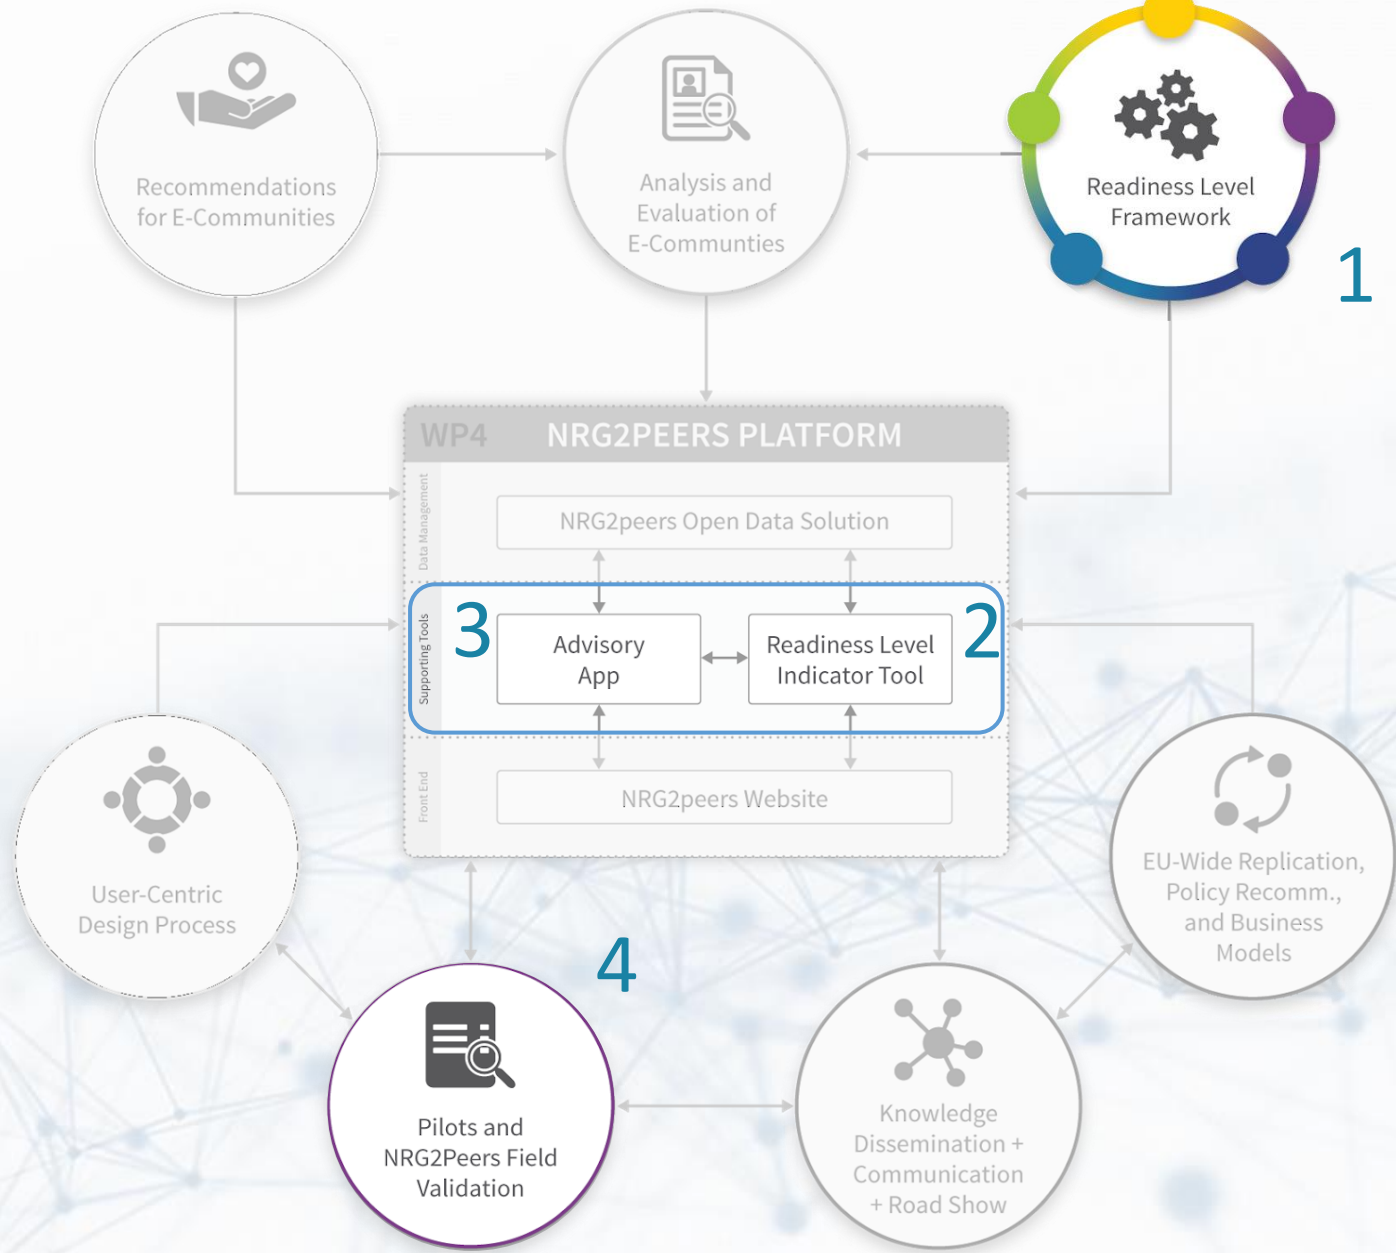

**Sylvia Breukers & Stefan Kop**  
Project Members / Work Package Lead  
Duneworks & Spectral

*The sole responsibility for the content of this presentation lies with the authors. It does not necessarily reflect the opinion of the European Union. Neither the EASME nor the European Commission are responsible for any use that may be made of the information contained therein.*

This project has received funding from the European Union's H2020 framework programme for research and innovation under grant agreement no 890345.

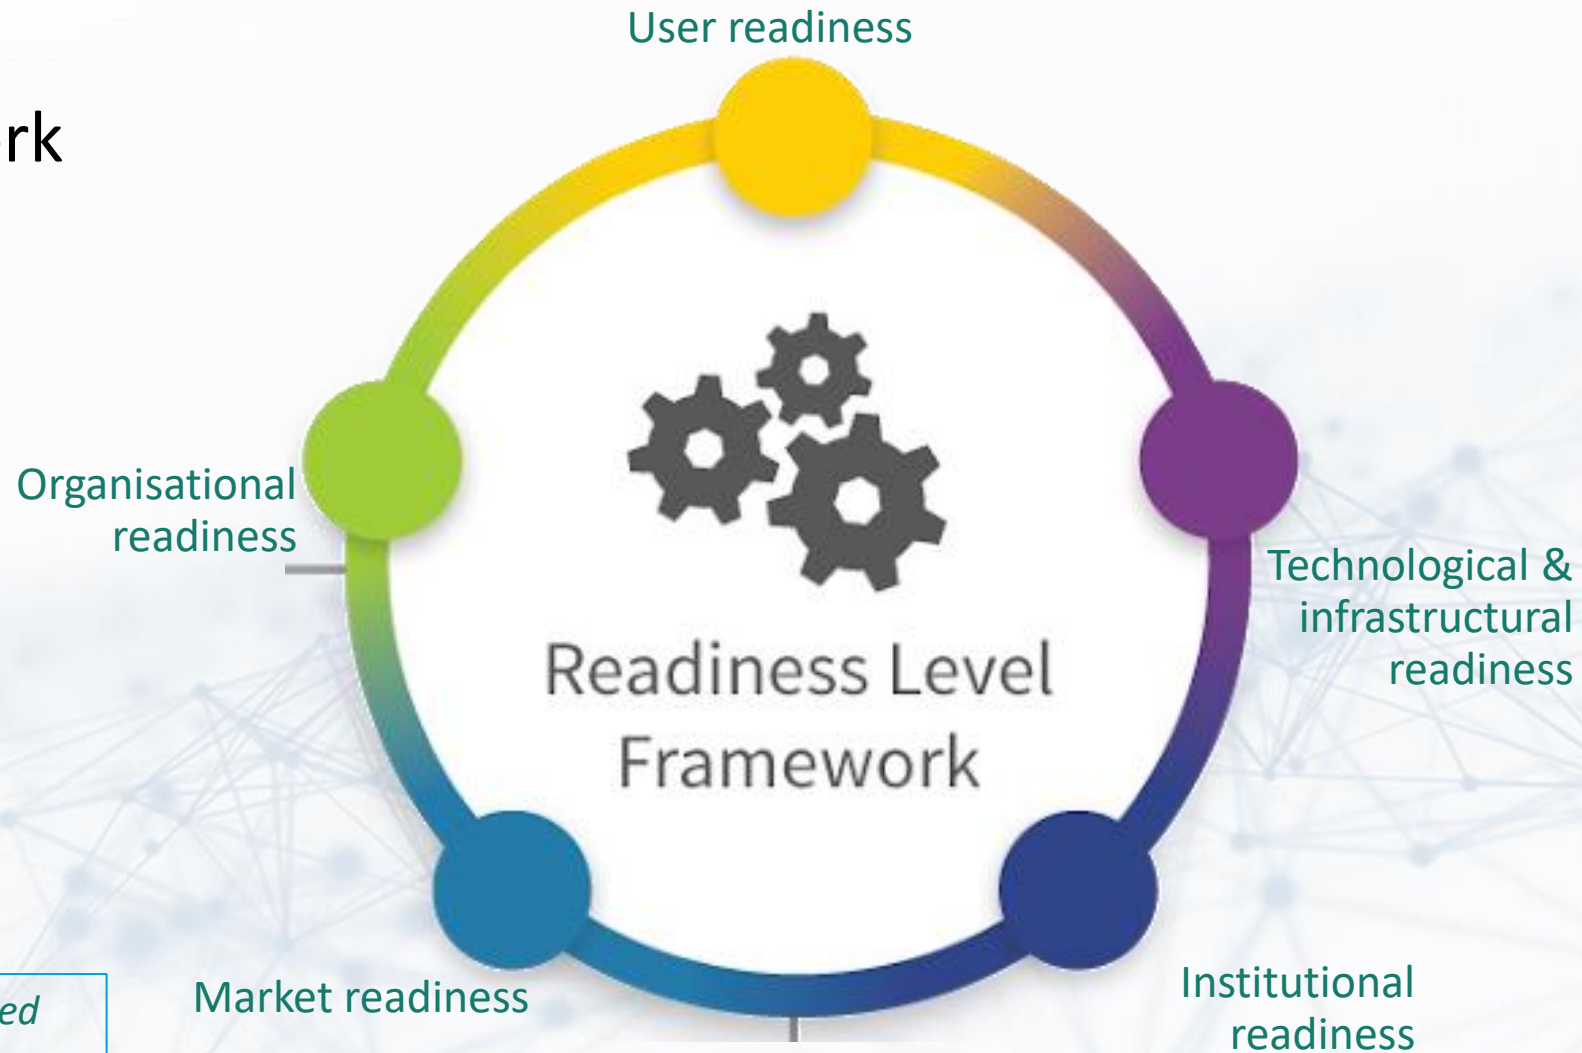

# Readiness Level Framework

- Co-creation; iterative rounds: comprehensive, multi-disciplinary (2020-2021)
- Envisaged users of the tool: ECs and policy actors
- Assessment tool; support tool for dialogue and decision making

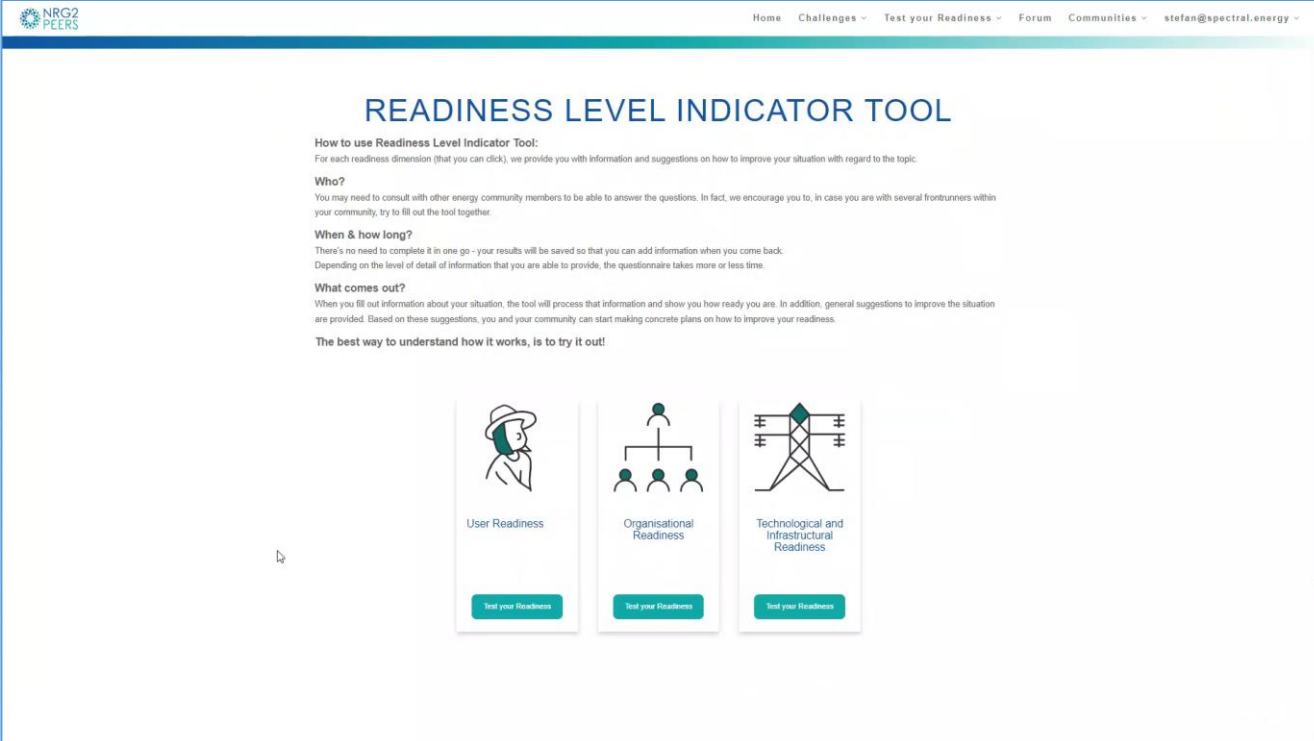

*The conceptual elaboration of the RLF offers detailed insight in the type of user-related, organisational, institutional, market and technological elements that need to be in place for communities to become engaged in P2P in a manner that will generate value for the community.*

# Readiness Level Indicator Tool (RLIT)

## Key features:

- Translation of the framework into a digital tool
- Target users: energy communities
- Guided “survey” with direct recommendations / suggestions
  - User, organizational, technological and infrastructural readiness

The screenshot shows the website for the Readiness Level Indicator Tool (RLIT) under the NRG2 PEERS project. The page features a navigation bar with links for Home, Challenges, Test your Readiness, Forum, Communities, and stefan@spectral.energy. The main heading is "READINESS LEVEL INDICATOR TOOL". Below this, there is a section titled "How to use Readiness Level Indicator Tool:" followed by instructions. The page is divided into three main sections: "User Readiness" (represented by an icon of a person on a phone), "Organisational Readiness" (represented by an icon of a person with a tree structure), and "Technological and Infrastructural Readiness" (represented by an icon of a power line tower). Each section has a "Test your Readiness" button. The footer of the page includes the NRG2 PEERS logo and the European Union flag.

# Readiness Level Indicator Tool (RLIT)

## Key features:

- Translation of the framework into a digital tool
- Target users: energy communities
- Guided “survey” with direct recommendations / suggestions
  - User, organizational, technological and infrastructural readiness
- Readiness level report after completion

## Scoring

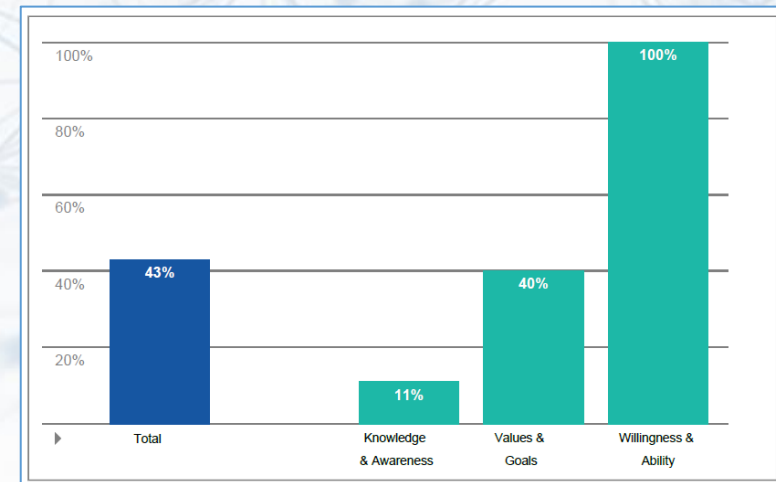

### Total Score

You've scored an overall score of 43%.

In this scoring the weightings you see below are applied.

### Per Category

Category	Score	Weighting
Knowledge & Awareness	11%	25%
Values & Goals	40%	25%
Willingness & Ability	100%	50%

# Readiness Level Indicator Tool (RLIT)

## Key features:

- Translation of the framework into a digital tool
- Target users: energy communities
- Guided “survey” with direct recommendations / suggestions
  - User, organizational, technological and infrastructural readiness
- Readiness level report after completion

## Improvement Suggestions

### Knowledge & Awareness

Depending on your score, you may want to address the following in your communication to and interactions with the users. In general, it is good to try and use as little (technical) jargon as possible, and to make use of visuals and/or video/animations as well. You can save yourself time by using existing materials provided by trustworthy and credible organisations (e.g. REScoop or national branches).

In the provision of informative materials and the discussions about these, consider the following topics to be addressed (not all at the same time!):

- Climate change and energy transition challenges
- Self-generation and self-consumption and why this can be a good idea for this community
- Variable tariffs, how they are relevant and what it could mean for the day-to-day household practices
- Demand flexibility, and what participation in P2P can entail for this community, and how P2P may affect their day-to-day household practices.
- What an energy management system is and what it does
- How the energy management within the community relates to the bigger picture (grid balance; creating space for more Res)

In addition, it is good to discuss the various benefits, as well as the disbenefits and possible risks of participating in P2P energy exchange. Benefits can refer to environmental, social, economic and financial aspects. These may accrue to the level of households, the community, the energy system, society at large.

At some point, it will also be important to start discussing how energy data monitoring is done or envisaged, why, and how data privacy and security is (to be) dealt with.

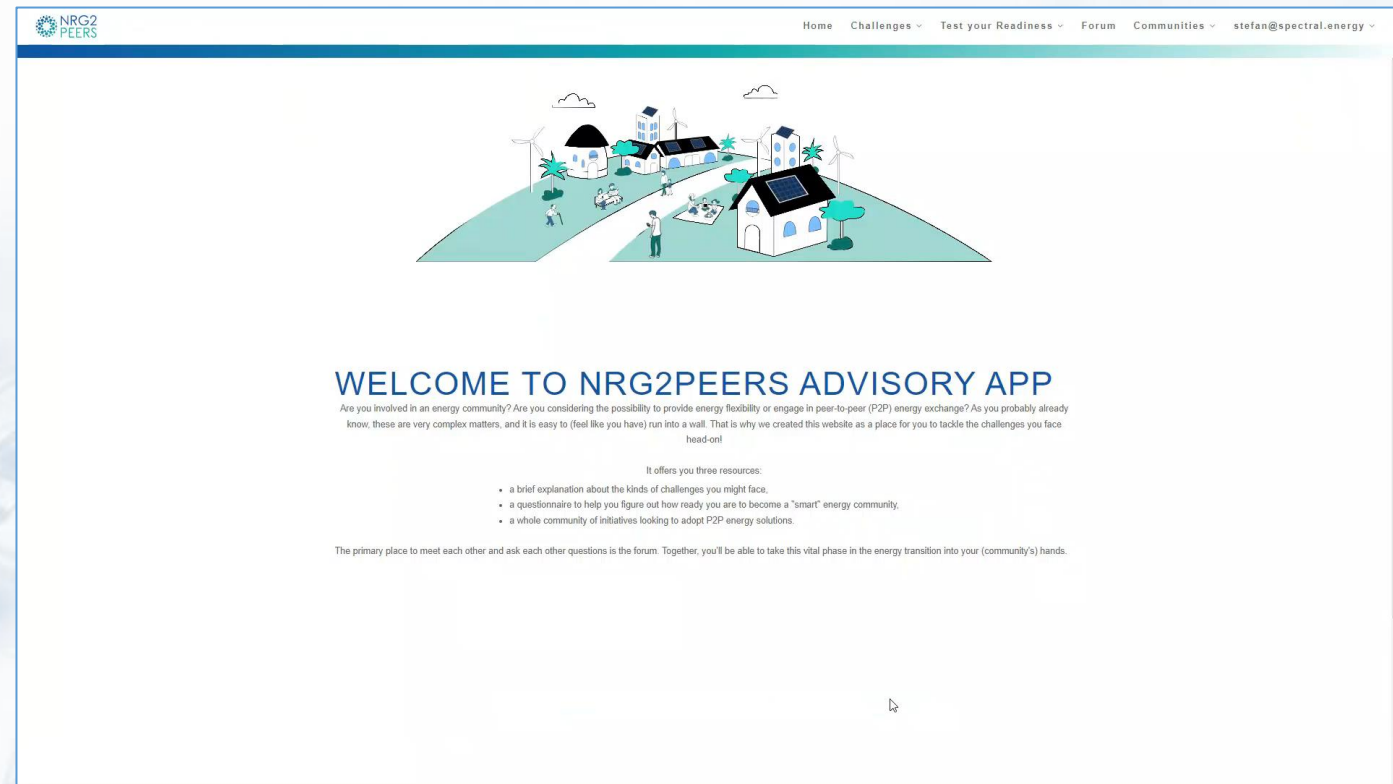

When users are informed about what they agree to in terms of data monitoring it is essential to use as little jargon as possible.

Make sure that the interface of e.g. the energy monitoring dashboard, is in line with (diverse) user needs as much as possible. This means that you need to inquire into their needs before, during and after the set-up of the user interface (during the use phase, new lessons are to be learned about the user-friendliness of the interface). Try to find out why those that do not use the interface, do not use it.

# Advisory App

## Key features:

- Community of communities
- Sharing of knowledge from and for (upcoming) communities and experts
- Structured around the same categories of the RLIT

# Advisory App

## Key features:

- Community of communities
- Sharing of knowledge from and for (upcoming) communities and experts
- Structured around the same categories of the RLIT
- Community page with specific information of the community
  - Option to link to RLIT scores

### Schoonschip Amsterdam

*The most sustainable floating neighbourhood in Europe, developed by its residents*

**General information**

Amsterdam / Netherlands  
Number of buildings: 46  
Residential buildings percentage: 98%  
Commercial buildings percentage: 0%  
Public buildings percentage: 2%

Operational in 2018

**Community Members**

Eelke Kingma ADMIN

90%	85%	95%
User Readiness	Organisational Readiness	Technological and Infrastructural Readiness
Ranking: 1	Ranking: 2	Ranking: 1

**Relevant Links**

**About**

A floating neighbourhood in the Johan van Hasseltkanaal, situated in the North of Amsterdam. In this ecologically and socially sustainable neighbourhood we live with 46 households, on 30 arks. 15 arks contain two households each, in a semidetached way. And we also realised a shared meetingspace on one of the arks.

**Goal**

The goal of Schoonschip was to create the most sustainable floating neighbourhood of Europe. This was the ambition that sparked the development by its residents, the actual elaboration of this goal became more specific along the process and is still in development till today.

---

# Participatory Assessment

Qualitative approach: survey; workshop; interviews

- September 2022 and Summer 2024
- First iteration: used to improve the tools
- Round 2: summer 2024 – recommendations for further improvements

## Lessons learned:

- Striking the right balance generic – specific
- Goal of the tools: assessment or awareness and conversation
- Forum: appreciated for its practical experiences
- P2P as a mobilizing concept
- Lost in translation (digitalisation)
- Engage the future hosts of the tool

Understandability  
Usability  
User-friendliness  
Attractiveness  
Reliability  
Credibility and Trustworthiness  
Cost-effectiveness  
Decision-driving potential

# NRG2 PEERS

# Process to develop the business model canvas

### PROBLEMS & BARRIERS

- Non sustainable urban pruning waste
- Unused coffee residues
- Unexploited forest residues
- Significant local energy poverty
- Fossil fuel dominance of heating
- Lack of awareness of biomass benefits
- Regulatory & Institutional barriers

### SOLUTIONS

- Affordable RH to the local community
- Decarbonization of heat energy for public buildings, local industries and households
- Production of solid biofuels from local waste
- Biomass boilers installation in municipal buildings

### KEY PARTNERS

**Local governance**

- Urban pruning
- Forest residues
- Potential end-users (public buildings, schools, pools, ...)

**Academia (UTH & CERTH)**

- Scientific support
- Biofuels optimization

**Biomass boilers firms**

- Installation, O&M

**Local community**

- Citizens
- Coffee houses
- Biomass owners
- Local industries (i.e hotels, ..)

### KEY ACTIVITIES

- ✓ Biofuel production (pellets)
- ✓ Provision of bioheat
- ✓ Urban waste management (pruning, coffee)
- ✓ Local awareness raising campaigns
- ✓ Municipal buildings energy upgrade
- ✓ Solar PV construction & NEM
- ✓ Future district heating network

### KEY RESOURCES

<b>Physical</b>	<b>Financial</b>
• Residues	• Member's equity
• Transport	• Bank Loan
• Equipment	<b>Intellectual</b>
• Experts	• Partnership
	• Knowhow

### VALUE PROPOSITIONS

- NECP → local bioenergy
- Competitive biomass price
- Tackle energy poverty
- Unexploited residues for RE
- Local waste management
- Decarbonization of the local heating system
- Reliable access to RH
- Business opp. for biomass
- Direct RE to public buildings
- Biofuel to citizens

### CUSTOMER RELATIONS

- Local Households → pellets/NEM
- Municipal buildings → pellets
- Local industries → bioheat

### CUSTOMER SEGMENTS

- Energy Community members (ESEK)
- Local community
- Municipalities of Karditsa/Plastira
- Local coffee houses
- Local industries (i.e hotels, ...)

### SUSTAINABLE CHANNELS

Pruning/Coffee → pellets → citizens

Forest residues → pellets → citizens

Pellets → school → boiler → heat

Solar → PV → NEM → members

### END OF LIFE

The local exploitation of biomass offers a reliable waste management system aligned with the circularity principles and the bioeconomy.

### COST STRUCTURE & ADDITIONAL COSTS

**Production costs**

- Equipment ~1MW biomass boilers (x20)

**Installation Costs & Grid Implementation**

- Transportation, connection, configuration

**Other Costs**

- R&D, Permits, Taxes, etc.

<b>CAPEX est.</b>	<b>OPEX est.</b>
100,000€	= 30,000 € / year
<b>Lifetime</b>	
25 years	• Plant operation
	• Maintenance
	• Biomass logistics
	• Labor costs
	• Annual fees/other

### SUBSIDISATION

**Financing sources**

Self-financing (new member fees)

Bank Loan (ΣΥΝΕΤΑΙΡ. ΚΑΡΔΙΤΣΑΣ)

Accumulation of investment capital

Crowdfunding

### REVENUE STREAMS

**Renewable Energy Savings**

- 730 MWh,th annual production
- Public buildings demands covered
- Reduced Energy bills
- Pellets trade market

**Other potential revenues**

- Boilers maintenance
- Hot water from biomass
- Local/state/ EU incentives
- Installation in other buildings

**Revenues\*:** 64,000 €/year

**ROI:** 25% **Pay Back:** 4 years

### ENVIRONMENTAL RISKS

- Air Pollution from materials manufacturing
- Exhaust emissions in transportation processes
- Unproper combustion may emit pollutants

### SOCIAL RISKS

- Short term loss of fossil fuel-based jobs
- Competition of local beneficiaries on the produced energy

### EU&National Funding programs

[EU Regional Dev. Fund](#)

[ΕΘΙΚΟΝΟΜΟ ΓΙΑ ΝΕΟΥΣ Cohesion Fund](#)

[ΕΘΙΚΟΝΟΜΟ ΕΠΙΧΕΙΡΩ Just transition fund](#)

[ΗΛΕΚΤΡΑ Recover & Resilience.](#)

[ΕΘΙΚΟΝΟΜΟ LIFE Program](#)

[Horizon Europe](#)

### ENVIRONMENTAL BENEFITS

- ~ 3,000 tn CO2 saved → 600 cars
- Decarbonization of the thermal grid
- Clean energy to public buildings
- Circularity within local waste management

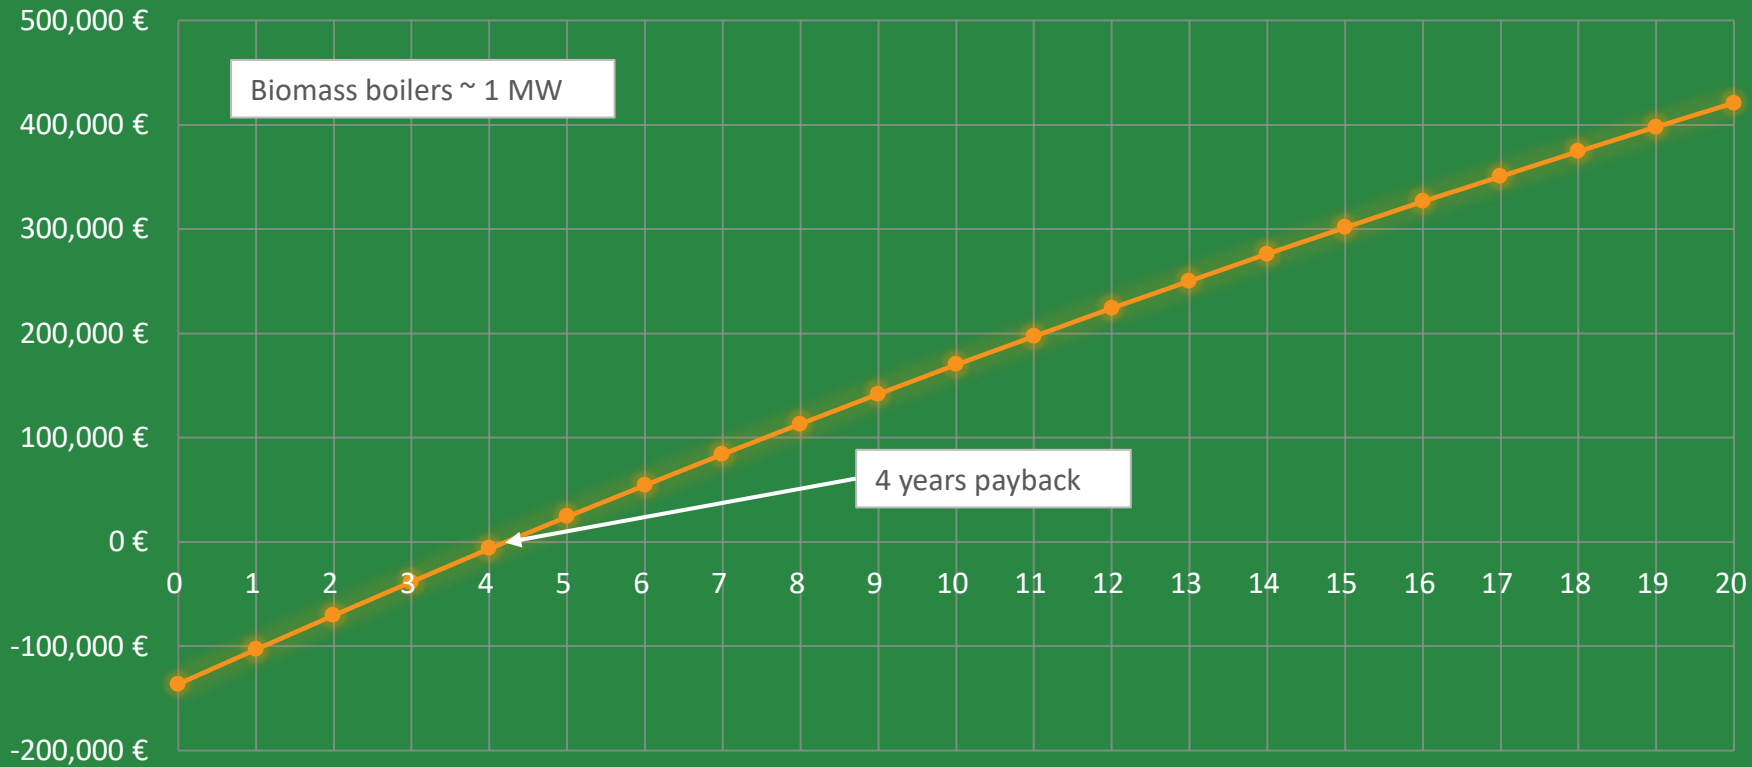

### SOCIAL BENEFITS

- Creation of new jobs (biomass)
- Support of the local economy
- Improved conditions/clean air
- RE to the wider region of Karditsa
- RH comfort to public buildings
- Raised Environmental awareness

# Investment evaluation

## Evaluation of the investment €

NPV	420.834 €
ROI	24,98%
Pay-back	4,00 years
IRR	22,23%

# BECoop: see you around!
