

W4SHE

Portraits of women and new energy horizons

W4RES

FLAMINIA ROCCA
Project Manager

W4SHE ...What is it?

From April 2023 to June 2023, as part of the W4RES awareness raising campaign for the Italian HUB, APRE carried out a collaboration with SHE IS A SCIENTIST, an Italian association launched in 2017 to enhance the contribution of women to science. The initiative was called "W4SHE", from the portmanteau between the names of the project and the association: it is a campaign to share role models, success stories and examples of women involved in the energy and RHC sectors.

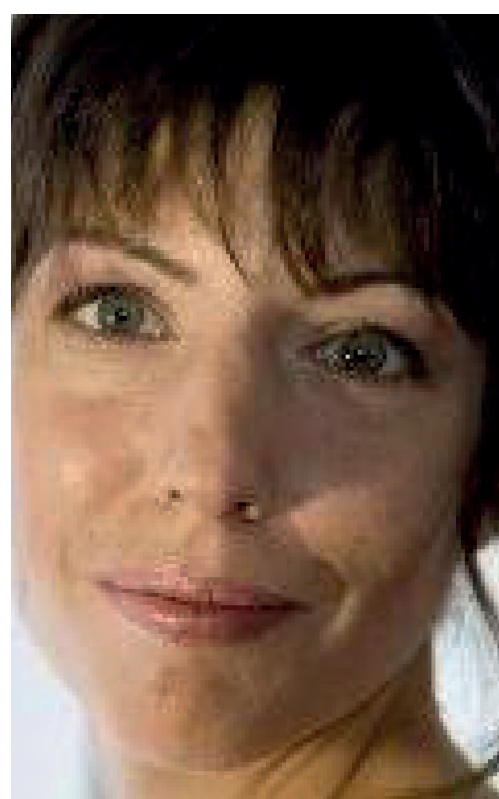

Every Monday an article with a role model profile written by Flaminia Rocca from APRE has been shared on SHE website and LinkedIn page (1150 followers), for a total of 10 articles and 13 posts.

PRESENTING

a project, a path, a tale...of women!

AURORE DUDKA

PhD in Economic Sociology and Labor Studies, researcher studying the role of women in the energy transition, energy community expert.

MARINE CORNELIS
