

newTRENDS

# Where are we with the newTRENDS project?

## Focus on the project papers by trend

### Towards a circular economy and a low-carbon industry

Coupling circularity performance and climate action

Dynamic material flow model for the European steel cycle

### Digitalisation of the economy and private life

How new societal trends will influence future energy demand in the European countries

### Transition from consumers to prosumers

Impact of smart energy management system on the residential electricity consumption in Austria

### Answering newTRENDS subgoals: focus on...

#### Smart metering

Enablers and Barriers in the Market-Driven Rollout of Smart Metering: Polish Technology Innovation System Analysis

Real time feedback on electricity consumption: evidence from a field experiment in Italy

#### New societal trends and energy demand

Mitigation options for decarbonization of the non-metallic minerals industry and their impacts on costs, energy consumption and GHG emissions in the EU

Coming soon!

Papers on the fourth trend: towards a shared economy.
