

# Compendium of resources for closing the loop in the policy process linking MRV to policy implementation

---

## Report D3.3

Project Coordinator: INSTITUTE FOR EUROPEAN ENERGY AND CLIMATE POLICY STICHTING - IEACP

Work Package 3 Leader Organization: Austrian Energy Agency

Month Year

This project has received funding from the European Union's Horizon 2020 Research and innovation programme under grant agreement No 840034.

## Authors

Felix Suerkemper, Wuppertal Institut

Johannes Thema, Wuppertal Institut

Responsible administrators: Mia Dragović Matosović and Vlasis Oikonomou, IEECP

With contributions by:

XXXXX YYYYYYYYYYYY, XXXXX YYYYYYYYYYYY[Optional]

With thanks to:

# 1 | Introduction

---

## 1.1 The ENSMOV project

ENSMOV is a European Commission Horizon 2020 project, aiming to provide support to Member States and their stakeholders to implement energy efficiency policies. Over the course of three years, the project will help Member States to monitor, revise, improve and implement their energy efficiency policies by developing resources on practical and strategic issues arising from Article 7 EED.

Building on previous knowledge and results developed from two influential Horizon 2020 projects that have helped to shape Member States' policies to address requirements of Article 7 EED — [ENSPOL](#) and [MULTEE](#) — the ENSMOV consortium aims to:

- facilitate and expand sharing of knowledge and experience amongst Member States (MS) for the implementation of policies under Article 7 EED;
- develop a suite of tailored resources and tools for the implementation of Article 7 EED to address the specific needs of Member States; and
- assist national authorities' in-house monitoring, reporting and verification (MRV) schemes with a view to ensuring they have robust data and insight to inform the (re)design of policies towards 2030.

ENSMOV is primarily supporting public authorities and key stakeholders in 14 Member States represented by its consortium (Austria, Belgium, Bulgaria, Croatia, France, Germany, Greece, Hungary, Italy, Lithuania, Netherlands, Poland, Romania and the UK). However, support will also be extended to other Member States and Accession Countries.

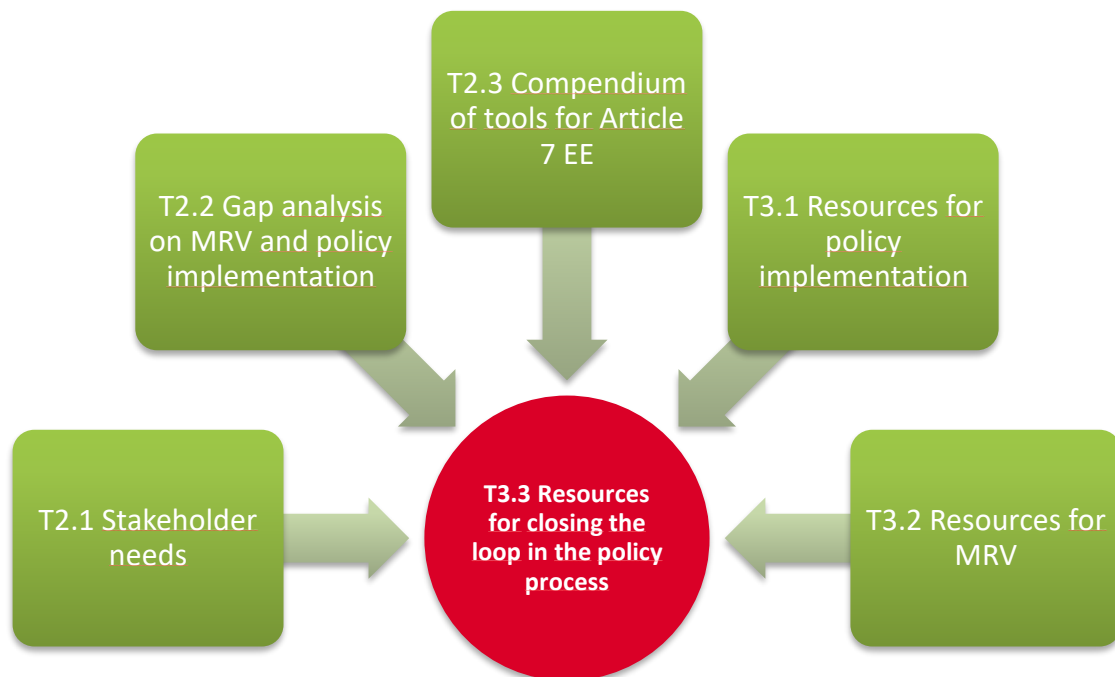

## 1.2 Purpose of the report

This report is produced within the scope of the European Union Horizon 2020 ENSMOV (Enhancing the Implementation and Monitoring and Verification practices of Energy Saving Policies under Article 7 of the Energy Efficiency Directive [EED]) project.

## 1.3 Methodology

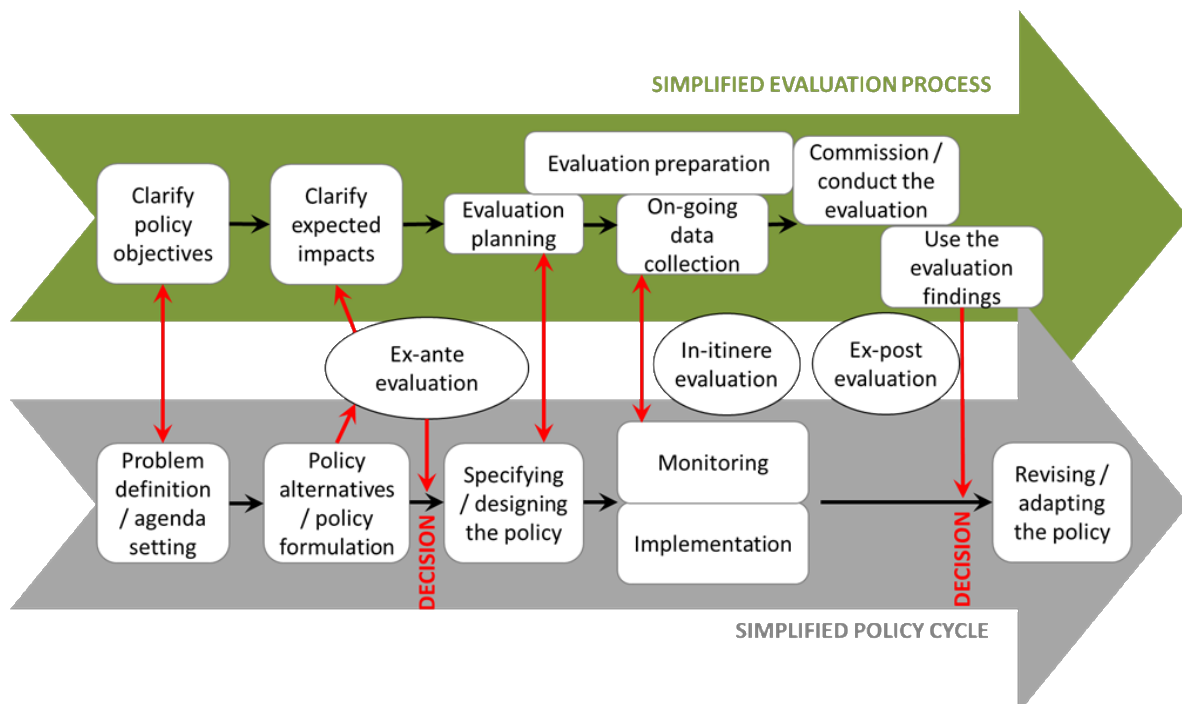

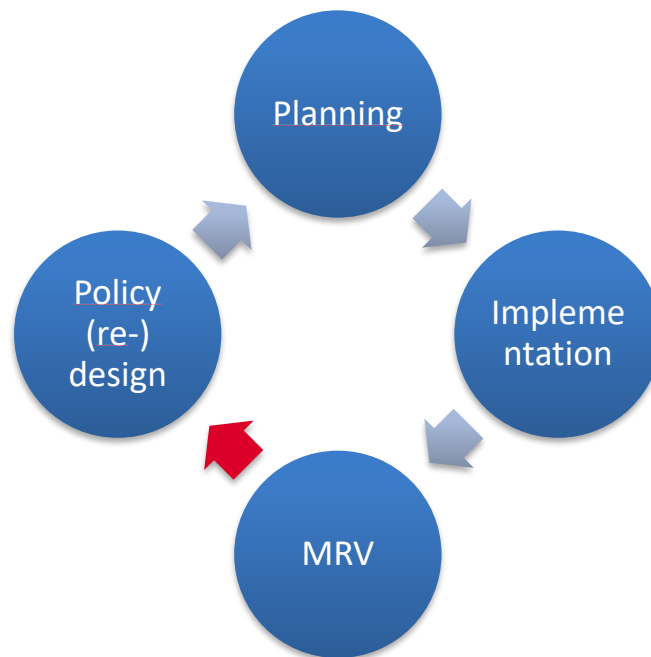

Approach of this task:

1. Scope: Stakeholder needs (T2.1) and gap analysis (T2.2)
2. Matching the tools (T2.3) with the gaps identified in T2.2
3. Analysing / describing why the tools are useful in overcoming the gaps identified. Check for potentially missing tools to close gaps (→ if needed research for closing loop)
4. Showing/matching good practices of Member States/international experiences in overcoming the gaps identified (basis: 28 snapshots of EEOs and alternative measures, international resources from T2.3)
5. Updating the report taking into account the resources for policy implementation and MRV identified / developed in T3.1 and T3.2

## 2 | Policy cycle

Focus of the report: from MRV to policy (re-)design (indicated by red arrow in graph)

Source: EPATEE (2019) D4.2, p. 14

## **3 | Resources for closing the loop in the policy process linking MRV to policy implementation and (re)design**

---

### **3.1 Public awareness and engagement with the energy efficiency opportunity**

**3.1.1 Gap relevance in the policy cycle**

**3.1.2 Appropriate tools and resources to close the gap**

**3.1.3 Good practice of Member States**

### **3.2 Stakeholder engagement in policy design of EEO's**

**3.2.1 Gap relevance in the policy cycle**

**3.2.2 Appropriate tools and resources to close the gap**

**3.2.3 Good practice of Member States**

### **3.3 Policy design and support for Alternative Measures**

**3.3.1 Gap relevance in the policy cycle**

**3.3.2 Appropriate tools and resources to close the gap**

**3.3.3 Good practice of Member States**

### **3.4 Policy design for Energy Efficiency Obligations**

**3.4.1 Gap relevance in the policy cycle**

**3.4.2 Appropriate tools and resources to close the gap**

**3.4.3 Good practice of Member States**

### **3.5 MRV programme design and implementation**

**3.5.1 Gap relevance in the policy cycle**

**3.5.2 Appropriate tools and resources to close the gap**

**3.5.3 Good practice of Member States**

## **3.6 Tackling energy poverty**

**3.6.1 Gap relevance in the policy cycle**

**3.6.2 Appropriate tools and resources to close the gap**

**3.6.3 Good practice of Member States**

## **3.7 Measuring energy savings from transport**

**3.7.1 Gap relevance in the policy cycle**

**3.7.2 Appropriate tools and resources to close the gap**

**3.7.3 Good practice of Member States**
