

# Transport measures in the energy savings obligation of the EED | What Member States plan and report

Tuesday 19 November 2024 | Webinar

European webinar of the ENSMOV Plus project

[Registration Link](#)

## Background and objectives

As can be seen from Member States' reports, since the EED is in force, measures in the transport sector are a weak spot in the delivery of the cumulative energy the energy savings for obligation set in the EU Energy Efficiency Directive (former Article 7, now Article 8).

This webinar is targeted at implementing authorities as well as organisations in charge of monitoring and reporting measures and energy savings in relation to the EED and will tackle the following issues:

- What transport measures have been reported in the past?
- What can be learned from these examples in terms of design as well as in terms on monitoring and reporting?
- What additional measures can be identified?

A focus will be put on measures targeting the increased share of electric vehicles.

## Agenda

10.00	Welcome and introduction to the webinar	Gregor Thenius (AEA)
10.10	<b>The support of electric vehicles as an alternative measure in Croatia</b>	Vesna Bukarica (EIHP)
10.30	<b>Transport measures in Article 7/8 implementation in Hungary</b>	Armin Böhm (HU)
10.50	<b>What the EU Commissions Guidance says on energy savings in transport</b>	Samuel Thomas (RAP)
11.10	<b>Discussions and wrap-up</b>	Participants
11.30	<b>End of the webinar</b>
