Added value of using measurements to monitor energy efficiency projects in industry: experience from Italy's and France's market players

Tuesday 1 April 2025, 10.00-11.30 CET | Online

EU workshop

Registration link: https://events.teams.microsoft.com/event/103f1b6a-e1f6-4449-b54c-4738f7ee12e2@42dda70e-92cc-47b1-8798-51e5ab77a469

Background and objectives

Energy efficiency projects in industry are often larger and more specific than for buildings. Therefore, measurements are often required for their monitoring and verification (M&V), especially in the framework of Energy Efficiency Obligation Schemes (EEOS) and white certificates schemes.

Measurements can help improve the reliability of energy savings data. This is important to know the actual impacts of the schemes, and also to build trust among market players. This can then support the development of energy services. However, if M&V requirements become too complex, they can create barriers to the implementation of new projects.

This workshop will share the experience from market players of Italy's and France's white certificates schemes, discussing the challenges and added values of using measurements for energy efficiency projects in industry, and related M&V requirements and practices.

The targeted audience includes market players (ESCos, energy companies), industry companies and trade organisations, and policy officers and experts involved in the M&V of policies for energy efficiency in industry.

See agenda next page.

Co-funded by the European Union under project n°101076098. Views and opinions expressed are however those of the speaker(s) only and do not necessarily reflect those of the European Union or CINEA. Neither the European Union nor the granting authority can be held responsible for them.

Agenda

10.00	**Overview** of the M&V framework for industrial projects in Italy's white certificates scheme | *Dario Di Santo, FIRE, Italy*
10.10	**Overview** of M&V for industrial projects in the context of France's white certificates scheme | *Olga Landesman, ATEE, France*
10.20	**Discussion** about similarities and differences
10.25	**Panel – Experience from the field:** • Experience from an ESCo operating in Italy | *Ignace de Francqueville, METRON* • Energy management in telco sector | *Federico Tebaldi, energy manager at TIM/FiberCop* • Experience from a French delegated party | *Antoine Fauchere, Certinergy* • Experience from a French ESCo | *Pierre-Damien Grosjean, Acciona*
11.15	**Q&A**
11.25	**Closing intervention** | *Ivana Rogulj, IEECP*
11.30	**End** of the workshop
